

QUARTERLY RADIOISOTOPE REPORT

1. If there have been recent personnel changes for your laboratory, please list names below and indicate if the individual(s) should be added to or deleted from the additional user list for your authorization.

2. Name of person(s) designated to keep radioisotope records (receipt, use, disposal, swipes, inventory).

3. Names of laboratory personnel who process (or plan to process) greater than 10 mCi of tritium at any one time, or within a one month period.

4. Names of laboratory personnel who handle a total quantity of bound radioiodine greater than 1.0 mCi in any three month period and do not have thyroid bioassays following an iodination procedure.

5. Names of laboratory personnel whose work requires routine manipulating of one millicurie or more of P-32.

6. If you have a Geiger counter or radiation monitoring instrument that has not been calibrated by Radiation Safety, please list the brand name and model number below.

7. Radiation Safety record keeping forms can be printed from the Radiation Safety web page. From the VCU home page, click on the following links:
Research,
Office of Environmental Health & Safety,
Radiation Safety,
Forms (under "Useful Information").
