Satellite Accumulation Area (SAA) Requirements

All hazardous waste must be accumulated at/or near the point of the generation of the waste, within the control, within the room, and within the sight of the generator.

Requirements checked during weekly inspection
Emergency contact information is posted at each SAA
Containers:
Only have compatible material contained within
Are in good condition and sealed except when adding material
Have manufacturer's label removed or completely obscured
Properly labeled with:
Must have the words 'Hazardous Waste' on label
Principal Investigator (PI) name and department
Building floor and room number of SAA
FULL proper chemical names (no formulas or abbreviations) Trade Name is allowable
Percentages of all wastes by volume
Final pH of waste (if known)
Multiple contents should be recorded on a separate waste label and fixed to the container.
